

**Occupational Health & Safety (OHS) is a core value of the Silk Logistics Group.**

The Silk Logistics Group is wholly committed to safe working practices and places the highest emphasis on Occupational Health & Safety in its operations.

The Silk Logistics Group recognises that excellence in managing Occupational Health & Safety is critical to the long term success of the business.

As such, the Silk Logistics Group must work to protect the health and safety of all employees and all other persons who may be affected by our operations, including contractors, subcontractors, visitors, customers and the public. **The target is zero harm.**

To achieve this target, the Silk Logistics Group has developed safe working practices, through a risk management approach, to ensure compliance with applicable laws, regulations and requirements.

The Silk Logistics Group expects and requires its employees and contractors to follow these working practices and support and contribute to continual improvement of OHS performance through safety awareness, hazard identification and control, safe working practices, incident and near miss reporting and a commitment to safety.

Any questions about OHS matters are to be directed to your supervisor, manager or OHS Manager.
